

## **Risk questionnaire**

Please note that the questionnaire is only suitable for clients that are comfortable with taking on some form of investment risk. It is not suitable for clients that are unwilling to take any investment risk. Client name Please tick the option that best describes how you feel about each question. If no option is exactly right for you, choose the one that is closest. **Question 1** How would you rate the degree of risk that you are willing to take in your financial affairs? 1. Extremely low risk 2. Low risk 3. Moderate risk 5. Extremely high risk 4. High risk Question 2 I am prepared to forego potentially large gains if it means that the value of my investment is secure. 1. I strongly agree 2. I agree 3. I neither agree nor disagree 4. I disagree 5. I strongly disagree **Question 3** In comparison with other people, I am more willing to make high risk investments. 1. I strongly disagree 2. I disagree 3. I neither agree nor disagree 5. I strongly agree 4. I agree Question 4 What is more important for you in the context of investments: the risk or the potential gains? 1. I always focus on the 2. I usually focus on the 3. I focus on the risk risk rather than the risk rather than the and potential gains potential gains potential gains about equally 4. I usually focus on the 5. I always focus on the potential gains rather potential gains rather than the risk than the risk **Question 5** What degree of risk would you say you have taken with your past financial decisions? 3. Moderate 1. Very small 2. Small 4. Large 5. Very large

Question 6				
What degree of risk do you	wish to take with your fu	ture financial decisions?		
1. A very small amount risk with very small potential returns	of 2. A small amorisk with sm potential ret	all risk v	derate amount of vith moderate ntial returns	
4. A large amount of risk with large potential returns	5. A very large of risk with v potential ret	very large		
	·			
Question 7	f			
Have you ever borrowed mor	Yes	king an investment (other ti	nan for a mortgage)?	
Question 8				
Would you borrow money for	the numbers of making an i	nvestment (other than for a	mortgage) in the future?	
No	Yes	Tivesurierit (Other thair ior a	mortgage) <b>in the luttile :</b>	
Question 9				
(Parts a, b, c, d, e, f) Experts tell us that as the value of investments can go up and down, we should be prepared to weather a downturn.  How upset would you be if the value of your investments fell by the following amounts in one year?				
Percentage fall	How upset would you b		Alana dika langa	
a) 50/	(1=not at all upset, 5=ver			
a) 5%	1 2	3	4 5	
b) 10%	1 2 2	3 3	4 5 5

Question 11				
What is the <b>current</b> amount of insinsurance, travel insurance etc.)	surance you buy (life insurance, he	ome insurance, medical		
1. Much less than most people I know	2. Less than most people I know	3. About the same as most people I know		
4. More than most people I know	5. Much more than most people I know			
Question 12				
What is the amount of insurance that you intend to buy <b>in the future</b> (life insurance, home insurance, medical insurance, travel insurance etc.)				
1. Much less than most people I know	2. Less than most people I know	3. About the same as most people I know		
4. More than most people I know	5. Much more than most people I know			
Question 13				
If you didn't require access to you would you be prepared to see you out of the markets and cash it in?	ur invested capital go down in val			
1. I would cash it in if there was any loss in value	2. Up to 6 months	3. Up to 1 year		
4. Up to 2 years	5. More than 2 years			
Question 14				
I can tolerate the risk of large loss high returns.	es in my investments in order to	increase the likelihood of achieving		
1. I strongly agree	2. I agree	3. I neither agree nor disagree		
4. I disagree	5. I strongly disagree			
Question 15				
If my stocks and shares dropped	in value by 20%, I would take tha	t as good time to:		
1. Sell them	2. Do nothing	3. Buy more stocks and shares		
Question 16				
Suppose that you are considering investing €20,000. You are selecting one investment from the six possibilities shown below.  There is a 50:50 chance that the investment will decrease in value, in which case you could end up with an amount as low as that shown in the left-hand box. Likewise, there is 50:50 chance that it will increase in value, in which case you could end up with an amount as high as that shown in the right-hand box.  For example, Investment A will always result in you ending up with your original sum of €20,000, whilst Investment F could result in between €14,000 and €52,000.  As you go from A to F your expected return increases but so does your risk.				
Please indicate which investment you would prefer				
Investment A €20,000	Investment B €19,000 €24,000	Investment C €18,000 €31,000		
Investment D  €17,000 €38,000	Investment E €15,000 €45,000	Investment F  €14,000 €52,000		

## **Question 17**

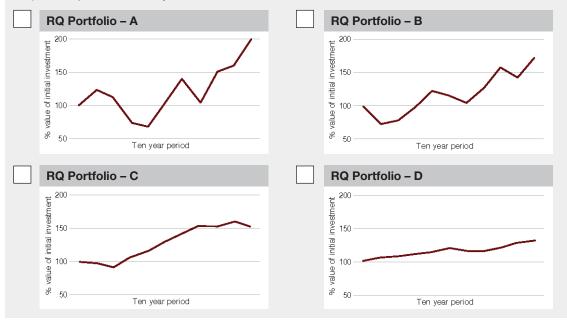

The graphs below show the performance of four hypothetical portfolios over a ten year period. Portfolio A doubled its value over the period, but it made big gains in some years, and suffered big losses in other years.

Portfolio D grew by a much smaller amount, but it was steady from year to year.

Portfolios B and C are intermediate between A and D both in their overall growth and in year to year fluctuations.

This question should only be considered in the context of your overall assessment of risk tolerance because **past performance** is **not** a **reliable guide to future performance**. You should not use information about the past to make decisions about the future.

However, considering your personal circumstances and reasons for investing (pension, income, growth etc.), which portfolio would you choose for the future?
